

## Introduction to AS 2885 and the Australian Pipeline Industry

### Course Outline:

A one day course for Engineers and/or newcomers to the Pipeline Industry.

The course provides an overview of Australian Pipelines, how it evolved, the major players and the major pipelines in Australia.

The course also includes an understanding of the sections that make up AS2885 - The Australian Pipeline Standard. In this part of the course, we look at the history of AS2885 and sections AS2885.0 General Requirements; AS2885.1 Design and Construction; AS2885.2 Welding; AS2885.3 Operations and Maintenance. The course also discusses AS2885.4 Offshore Pipelines and AS2885.5 Field Pressure Testing.

### Learning Outcomes:

At completion of the course the attendee will have received an introduction in the following subjects:

- Australian Pipelines
- The development of AS2885 – The Australian Pipeline Standard
- AS2885.0 General Requirements
- AS2885.1 Design and Construction
- AS2885.2 Welding
- AS2885.3 Operation and Maintenance

### Intended audience:

Engineers and Pipeline Construction Personnel and anyone wanting to know more about the Pipeline Industry. This course focuses mainly on pipelines transporting oil and gas.

### Course Content/Session Titles:

- ❑ Topic 1 – Australian Pipelines
- ❑ Topic 2 – The development of AS2885 – The Australian Pipeline Standard
- ❑ Topic 3 – AS2885.0 General Requirements
- ❑ Topic 4 – AS2885.1 Design and Construction
- ❑ Topic 5 – AS2885.2 Welding
- ❑ Topic 6 – AS2885.3 Operation and Maintenance

**Number of participants:** maximum 12 (in public schedule)

**Duration:** 1 day

**More info:** check [www.piped.com.au](http://www.piped.com.au) for delivery dates on the public schedule in several capital cities or to register online

**Enquiries:** contact course coordinator Ivonne Kuypers at [Ivonne.kuypers@piped.com.au](mailto:Ivonne.kuypers@piped.com.au)

Phone: 07-3870 7333

**Cost:** \$890 (excl GST) per person on public schedule, please contact course coordinator if you want a quote on in-house course delivery
